NPDES FORM 6100-28	⬥EPA	UNITED STATES ENVIRONMENTAL PROTECTION AGENCY WASHINGTON, DC 20460 ANNUAL REPORT FOR STORMWATER DISCHARGES ASSOCIATED WITH INDUSTRIAL ACTIVITY UNDER THE NPDES MULTI-SECTOR GENERAL PERMIT	FORM Approved OMB No. 2040-0004

Permit Information

Report Year: 2018

NPDES ID: MAR053839

Facility Information

Facility Name: CAMBRIDGE

Facility Point of Contact

First Name   Middle Initial   Last Name: Brian   .   O'Connell

Organization:

Title:

Phone: 617-498-4594   **Ext.**

Email: brian.e.oconnell@gcpat.com

Facility Mailing Address

Address Line 1: 62 WHITTEMORE AVE.

Address Line 2:   **City:** CAMBRIDGE

ZIP/Postal Code: 02140   **State:** MA

County or Similar Division: MIDDLESEX

General Findings

Provide a summary of your past year's routine facility inspection documentation (see Part 3.1.2 of the permit). In addition, if you are an operator of an airport facility (Sector S) that is subject to the airport effluent limitations guidelines, and are complying with the MSGP Part 8.S.8.1 effluent limitation through the use of non-urea-containing deicers, provide a statement certifying that you do not use pavement deicers containing urea (e.g., "Urea was not used at [name of airport] for pavement deicing in the past year and will also not be used in 2015." (Note: Operators of airport facilities that are complying with Part 8.S.8.1 by meeting the numeric effluent limitation for ammonia do not need to include this statement.)

> All required quarterly inspections were completed and did not find any failed control measures or control measures needing maintenance or repairs. No noncompliance issues were identified. One inspection noted a housekeeping issue and recommended restocking of a spill kit which both recommendations were completed.

Provide a summary of your past year's quarterly visual assessment documentation (see Part 3.2.2 of the permit).

> All four quarterly visual assessments were completed at the time of sampling. Some assessments showed minor amounts of solids or discoloration. The resulting corrective action review showed that sampling results above applicable benchmarks were not believed related to industrial activities.

For any four-sample (minimum) average benchmark monitoring exceedance, if after reviewing the selection, design, installation, and implementation of your control measures and considering whether any modifications are necessary to meet the effluent limits in the permit, you determine that no further pollutant reductions are technologically available and economically practicable and achievable in light of best industry practice, provide your rationale for why you believe no further reductions are achievable (see Part 6.2.1.2 of the permit). Enter "NA" if not applicable.

> NA

Provide a summary of your past year's corrective action documentation (See Part 4.4 of the permit). (Note: If corrective action is not yet completed at the time of submission of this annual report, you must describe the status of any outstanding corrective action(s).) Also describe any incidents of noncompliance in the past year or currently ongoing, or if none, provide a statement that you are in compliance with the permit.

Benchmark exceedances are not believed to be related to industrial activities. However the site completed additional street sweeping and i s reviewing options to replace deteriorating concrete paving.
